

YOGA P

Chennai | 8838806288 | yogaprakasam07@gmail.com | <https://www.linkedin.com/in/yogaprakasam>

OBJECTIVE

Software Developer (Full Stack) with hands-on experience building scalable web applications and AI-powered systems. Proficient in Next.js, Express.js, Python, and SQL, with strong fundamentals in data structures, APIs, and system design. Delivered production features for e-commerce and security systems with real-time integrations.

EDUCATION

SENGUNTHAR COLLEGE OF ENGINEERING, Namakkal, Tamil Nadu, India.

B. TECH Artificial Intelligence & Data Science CGPA: 8.5

Sep 2021 - May 2025

AVVAIYAR GOVERNMENT GIRLS HIGHER SECONDARY SCHOOL, Dharmapuri, Tamil Nadu, India.

SSLC: 2018 - 2019 Percentage: 84%

HSC : 2020 - 2021 Percentage: 82%

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks: Next.js, Express.js

Web: REST APIs, Authentication, Responsive UI, CRUD, MVC

Data/ML: Pandas, NumPy, OpenCV, Feature Engineering

Tools: Git, VS Code, PyCharm, Jupyter, Power BI, Excel

Platforms: Supabase, Flutter (basic)

INTERNSHIPS

IDM TechPark - Data Analytics Intern

Jan 2024 - Feb 2024

- Gained hands-on experience in data analytics using tools like Power BI, Tableau, Excel, SQL, and Python to efficiently analyze and interpret complex datasets. Created interactive dashboards and storytelling visuals using Power BI and Excel, enabling impactful data presentation, trend analysis, and data-driven decision-making across multiple use cases.

ImageCon - Machine learning

Sep 2023 - Oct 2023

- Gained hands-on experience in machine learning and deep learning, focusing on CNN and RNN techniques. Completed a real-time image classification project using CNN, enhancing skills in data preprocessing, model building, training, and performance evaluation.

EXPERIENCE

Twite AI Technologies — Junior AI Engineer (Full-Time)

August 2025 – September 2025 | Chennai, India

- Developed ML-driven features and integrated Text-to-Speech (TTS) into applications.
- Contributed to a college management app (Flutter + Supabase) with real-time data operations.
- Applied prompt engineering and agentic workflows for improved AI interactions.

MEE Softwares— Associate Software Developer

Jan 2026 – Apr 2026 | Chennai, India

- Built and shipped features for an e-commerce platform using **Next.js** and **Express.js**.
- Implemented REST APIs for products, orders, and authentication; improved API response consistency and error handling.
- Developed warranty support module enabling product tracking and service requests, reducing manual handling.
- Optimized user dashboard flows and UI responsiveness based on client feedback.
- Debugged production issues and improved performance through code refactoring.

PROJECTS

HR Analytics Dashboard

Excel, SQL, POWER BI

- Designed dashboards to track performance, retention, and engagement metrics.
- Performed data cleaning and modeling to support decision-making.

FINAL YEAR PROJECT

Banking Security System with Face Recognition

Python | OpenCV | LBPH

- Built face recognition authentication pipeline for secure access control.
- Integrated real-time alerts via Telegram, SMS, and Email for anomaly detection.
- Implemented logging/monitoring for audit trails and incident tracking.

CERTIFICATIONS

Courses:

- Excel and Visualization | **LinkedIn Learning**
- Data Analytics & Tools | **Coursera**
- Data analytics with python | **NPTEL**
